

THE F3 PROJECT

Mission:

A Salisbury community project working to improve access to healthy food.

What they do:

The F3 Project was set up in 2022 when founders learned that the [Salisbury Pantry](#) needed fresh food to supply to those affected by the steep rise in cost of living. The project is developing a patch of land at Chafyn Grove School to grow this produce in a sustainable way with the end goal of improving nutrition. F3 works with members of the local community, hoping to pass on gardening skills to inspire future gardeners, young and old.
